Your Easy Action to Reduce Climate Pollution this November

Leave Your Leaves

Raking & bagging leaves produces a surprising amount of climate pollution.

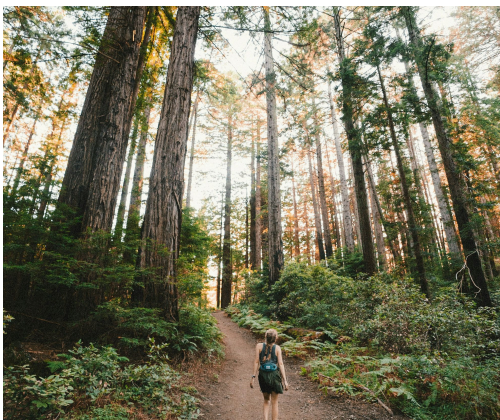

The process of collecting, transporting, and disposing of leaves requires dirty fossil fuels. By avoiding this unnecessary yardwork, you can reduce your climate pollution and help combat climate change, while also enjoying a healthier environment! Can't avoid it?! Swap to an electric leaf blower! 1 hour of a gas-powered leaf blower is the **same as** driving a sedan ~1,750

kms!

Share photos of you "leaving your leaves" to help us show the community how small actions can create a big impact together! **Send to us** on our [Facebook](#) or [Instagram](#) accounts or email them to info@collingwoodclimateaction.com
